OPDIV:

CDC

Name:

AHB Non-Wintel Patch Managent

PIA Unique Identifier:

P-7650860-187423

The subject of this PIA is which of the following?

Minor Application (child)

Identify the Enterprise Performance Lifecycle Phase of the system.

Development

Is this a FISMA-Reportable system?

No

Does the system include a Website or online application available to and for the use of the general public?

No

Identify the operator.

Agency

Is this a new or existing system?

New

Does the system have Security Authorization (SA)?

No

Indicate the following reason(s) for updating this PIA.**Describe the purpose of the system.**

The AHB Non-Wintel patch management system is an initial testing platform for the Lumension® Patch Management product providing non-Wintel patch collection, distribution and reporting services. The testing platform includes 5 – 10 servers for both application and end-point services. An estimated test window of 30 – 45 days will be required. There will be no CDC production or PII data held within this testing system.

Describe the type of information the system will collect, maintain (store), or share.

This is a proof of concept and development system only. There is no CDC/AHB data associated with this system. The system is being established in order to evaluate the Lumension solution. There will be no data collected. There will be no PII data collected or processed.

Provide an overview of the system and describe the information it will collect, maintain (store), or share,

This is a proof of concept and development system only. There is no CDC/AHB data associated with this system. The system is being established in order to evaluate the Lumension solution. There will be no data collected. There will be no PII data collected or processed.

Does the system collect, maintain, use or share PII?

No
